Parent & Carer Comments

5 mins seemed just too short especially in 3rd year where there may have been queries and or concerns regards moving into 4th year . 10 mins would have been better
It was very well organised. Well done to the teachers
I think a little bit longer per teacher would be good so we can actually ask any questions and have time to answer I don't feel like 5 mins was long enough
I thought that it went well, although with a couple of the teachers the sound was bad and it froze a couple of times
So efficient, first parents evening in 10 years that's ran on time, think it should be used going forward for all
5 minutes was very tight. Only half had camera working?
Excellent experience, enjoyed the one to one experience without the background noise or distractions that can be found at a normal parents evening. All appointments were on time and could not run over time which was great.
This worked great for us.
Overall they system was good. Teething problem on the first call as not sure if the teacher was there or not as couldn't hear or see them. I was able to speak to all of ---'s teachers, when ---- makes the appointments at school he doesn't manage to get all of them. So was glad I managed to speak to all (but one) as I can help ---- make his decisions for next year based on the feedback from his teachers.
Appointment time just wasn't long enough..by the time the teacher caught up on asking how my daughter was and vice versa the time was up... Don't like how it automatically cuts them off either.
After yesterday's first online parents evening no technical issues and felt more at ease instead of appointments running over and getting lost trying to find teachers at school so definitely a big yes from us
Out of 10 appointments I could see and hear 5 teachers 2 didn't connect and 3 only had sound no Vision..overall it was good for a first attempt.👍
I do not wish to see a future where we don't interact in person so whilst it was very convenient I don't think we as a community should continue this way. These interactions are limited to the people you have appointments with, it is nice to see the older pupils, headteacher, other parents etc around at these events
It was a great way of doing it however my first 2 appts were fine I could see and hear the teachers then after them I could only hear them and them I. No video until 2nd last appt when I saw and heard teacher then last one only sound. I have a brand new iPhone 12 and excellent WiFi connection. So could not understand the reasons for this. I felt the 5 min slot was too short as I was looking for a wee bit more info from a couple of appointment s others 5 mins were plenty.
